

The screenshot shows the Visual Studio Code interface with a terminal window open. The Explorer pane on the left shows the project structure for 'StudentRecordsAPI 15sep', including files like 'server.js', 'package.json', and 'package-lock.json'. The terminal window displays the following commands and output:

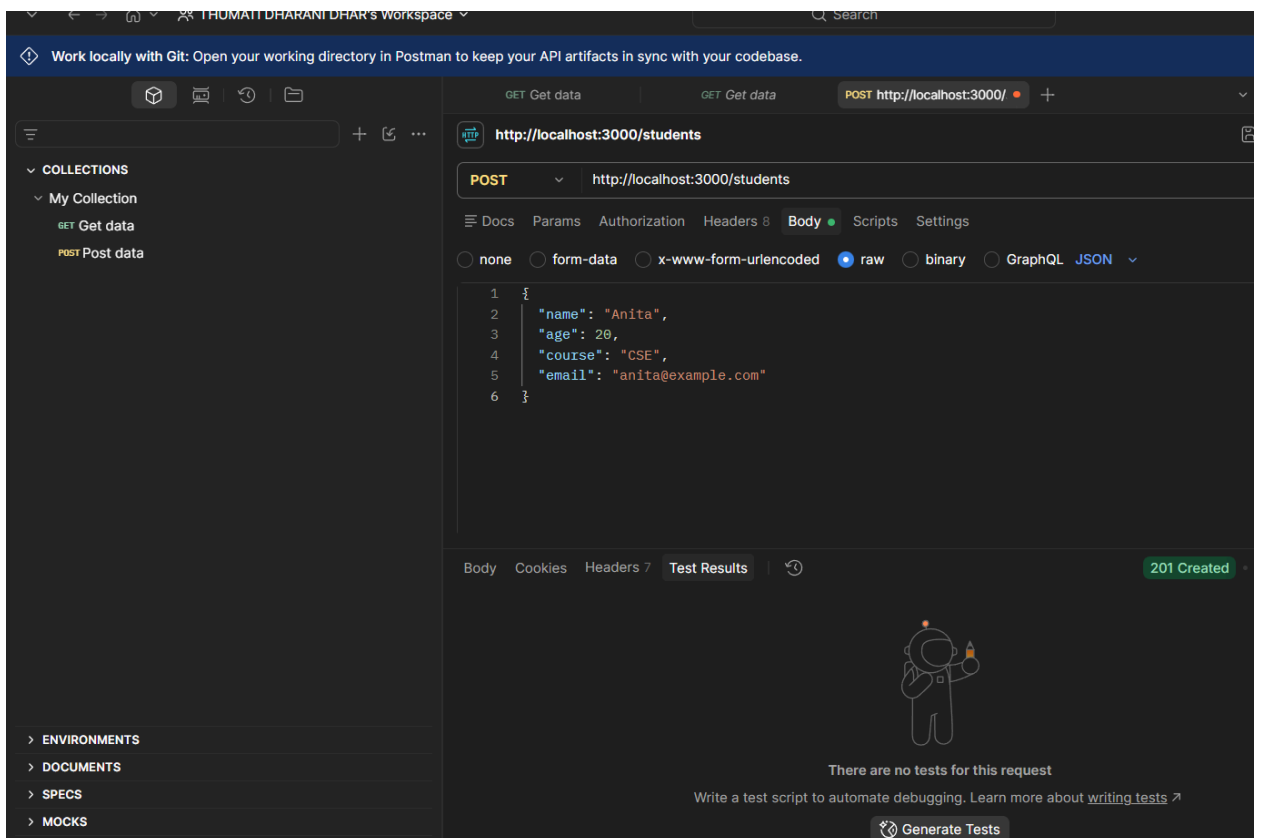

```
PS D:\2-1\DBSE & DBD\StudentRecordsAPI 15sep> npm run dev
requireStack: []
}

Node.js v25.9.0
PS D:\2-1\DBSE & DBD\StudentRecordsAPI 15sep> type .\node_modules\.bin\nodemon.cmd

The screenshot shows the Postman application interface. The top bar indicates 'Work locally with Git: Open your working directory in Postman to keep your API artifacts in sync with your codebase.' The left sidebar shows the 'COLLECTIONS' pane with 'My Collection' expanded, containing 'GET Get data' and 'POST Post data'. The main area shows a POST request to 'http://localhost:3000/students'. The request body is raw JSON:

```
{
  "name": "Anita",
  "age": 20,
  "course": "CSE",
  "email": "anita@example.com"
}
```

The 'Test Results' tab at the bottom shows a status of '201 Created' and a message: 'There are no tests for this request. Write a test script to automate debugging. Learn more about [writing tests](#).' A 'Generate Tests' button is visible at the bottom right.
